AMIRA SHINNAWI

Flutter Developer

Cairo, Egypt (Open to Relocation & Remote Work) 01025167595 amirashenawy123@gmail.com
LinkedIn GitHub Portfolio

Summary

- **Mobile App Developer** with 2+ years of experience in cross-platform development using Flutter. Experienced in building scalable, high-performance mobile applications with clean architecture and modern state management. Also working as a freelance Flutter Instructor, mentoring developers and delivering practical training. Passionate about continuous learning and building impactful products.

Experience

GTS (Global Technology Solutions) Nov 2024 – Present — Mansoura, Egypt
Mobile App Developer (Full-time)

- Developed and maintained 6+ cross-platform mobile apps using Flutter.
- Collaborated with UI/UX designers and backend teams for API integration.
- Prepared and deployed apps to Google Play and Apple App Store.

Mindset Trainings June 2024 – Nov 2024 — Kafr El Sheikh, Egypt
Flutter Instructor

- Delivered Flutter courses from beginner to advanced levels.
- Covered UI development, state management, API integration, and Firebase.
- Guided students through practical projects and best practices.

Orange Digital Center Aug 2023 – Sep 2023 — Mansoura, Egypt
Summer Training Software Technology Track

- Learned software engineering fundamentals including OOP and design patterns.
- Built a structured software project applying best practices.
- Implemented unit testing to improve reliability and code quality.

Google Developer Student Club Dec 2022 – Sep 2023 — Egypt
Training Flutter Track

- Developed Flutter applications using Dart.
- Integrated REST APIs and GraphQL services.
- Implemented local storage using SharedPreferences and Hive.

Projects

Spider Mar 2026 – Present

- **Technologies:** *Flutter, RESTful APIs, Cubit/BLoC, MVVM, Custom ERP Integration, Firebase Messaging, Payment POS Printer Integration, Barcode/QR Scanning, Localization*
- A comprehensive real-time Business Management and POS mobile application, optimizing business operations and enabling granular tracking of sales, inventory, and detailed reporting.
- Integrated custom ERP calculations, implemented user-friendly POS features including receipt printing and barcode/QR scanning, and utilized Firebase messaging and RESTful APIs for real-time synchronization and notifications.

The Kitchen (App Store)🔗 | *Flutter, REST APIs, Cubit, Clean Arch, Animations, ERP & Thermal Print* Nov 2025 – Mar 2026

- Designed and developed a tablet and mobile-based restaurant POS system integrated with ERP and CRM to manage dine-in, takeaway, and delivery orders.
- Delivered key POS features including invoice generation & thermal printing, order transfers, table switching, daily open/close sessions, reporting, collections, and refunds.

Brace Up (App Store🔗 | Google Play🔗) | *Flutter, Cubit, MVVM, Supabase, SQLLite* Mar 2026 – Present

- Designed and developed an offline-first cross-platform educational app for dental fellowships (App Store & Google Play), utilizing SQLite and Supabase for seamless data synchronization.
- Delivered a robust admin panel for managing mock exams and integrated a Flutter Web platform (hosted on Vercel) enabling doctors to publish courses and manage student bookings.

Islami Hub (App Store)🔗 | *Flutter,Rest Api,Cubit, Clean Architecture, Animation,Hive ,Audio Player* Oct 2025 – Nov 2025

- Built entirely offline using Hive for local storage.
- Prayer time notifications and Qibla compass for accurate direction.
- A complete Quran with tafseer and multiple reciters for audio playback.
- Radio and live Quran channels for continuous listening.
- Sections for daily duas, azkar, and guides for prayer and wudu.

CRM GTS (App Store)🔗 | *Dart, Flutter, Firebase, RESTful API, GraphQL, Cubit, BLoC, MVVM* Apr 2025 – Aug 2025

- Developed a customer support mobile app for GTS product users to submit and track support tickets.
- Implemented real-time push notifications using Firebase Cloud Messaging.

Dalil | *Flutter, Firebase Cloud Message, Rest Api, Cubit, MVVM, Agora, Localization, Pay Integration* Nov 2024 – Jane 2025

- Developed a comprehensive guide app offering technical services (e.g., identity/profile design, website and application creation).
- Integrated Agora for real-time chat and calls to communicate technical support, and Moyaser for secure in-app payments.
- Built using Flutter, Dart, and Bloc architecture, ensuring a scalable structure, smooth performance, and maintainable codebase.

GTS System | *Flutter, Firebase, Rest Api, Cubit, MVC, Animation, Thermal Printing, ERP-Integrated* Jane 2025 – Mar 2025

- An ERP System developed to support sales representatives, covering accounting and business workflows.
- Implemented core features, including invoice creation and printing via thermal printers, receipt vouchers, and stock transfer requests.
- Enabled customer management, report generation, and sharing, and integrated real-time notifications for a smooth workflow.

GTS E-Commerce & Delivery System Jul 2025 – Oct 2025

- **Technologies:** *Flutter, REST API, Cubit, MVVM, Animation, SignalR, ERP-Integrated, Payment Integration, Localization*
- Developed an integrated e-commerce and delivery management ecosystem with an underlying ERP for browsing products, placing orders, and handling real-time assignments.
- Implemented secure payment gateways and integrated SignalR notifications for instant order updates, enabling seamless order acceptance and rejection for delivery staff.
- Added robust tracking and payment collection features to ensure smooth coordination between customers, delivery teams, and the core system.

Education

Kafr El-Shaykh University Oct 2020 - June 2024
Bachelor of Computers and Information Sciences *Kafr El-Shaykh*

- **Department:** Information Science
- **Overall Grade:** Very Good with Honors (81.36%)

Technical Courses and Certifications

Certified Software Engineer Sept 2025
Hacker Rank

Software Technology Aug 2023 – Sep 2023 — Mnsoura, Egypt
Orange Digital Center

Flutter Diploma Dec 2022 – Sep 2023 — Egypt
Google Developer Student

Courses

- Flutter & Dart Complete Development Course.
- Flutter Advanced Course Bloc and MVVM Pattern.
- Flutter Payment Integration: Stripe, PayPal.

Technical Skills

Languages: Dart, Java, C#, HTML, CSS
Concepts: OOP, Clean Code, SOLID Principles, Design Patterns
Frameworks & Libraries: Flutter
Databases: Firebase, Supabase, MySQL (XAMPP)
APIs: RESTful APIs, GraphQL
Tools: Git, GitHub, Firebase, Postman, Figma
Architectural Patterns: Clean Architecture, BLoC, MVVM, MVC
Soft Skills: Planning, Organization, Teamwork, Communication, Analytical Thinking, Multitasking, Responsibility, Work Under Pressure

Languages

Arabic: Mother Tongue
English: Intermediate Language
