SUMMARY

Flutter Developer with 3 years of professional experience building and delivering cross-platform mobile applications for business, e-commerce, education, and customer-facing products. Experienced in developing ERP-integrated POS and business applications, offline-first solutions, real-time features, payment integrations, and hardware-connected mobile experiences. Have independently delivered a freelance product from development to App Store and Google Play release, while also contributing to team-based products in a professional software environment.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Android, iOS, Flutter Web, cross-platform development, responsive UI, animations, localization.

Architecture & State Management: Clean Architecture, BLoC/Cubit, MVVM, MVC, SOLID, Design Patterns, Dependency Injection.

Networking and Real-Time: REST APIs, GraphQL, SignalR, Agora (chat and calls), push notifications (Firebase Cloud Messaging).

Data and Backend Services: Firebase, Supabase, SQLite, Hive, offline-first design, data synchronization

Business Systems and Hardware: ERP integration, POS systems, payment gateway integration, thermal printing, barcode and QR scanning, reusable package development.

Testing, CI/CD & Release: Practical Flutter Testing, Calculation Validation, Codemagic CI/CD, Google Play Console, App Store Connect.

Tools and Practices: Git, GitHub, Jira, Agile, code reviews, Postman, Figma.

EXPERIENCE

Sporton — Sports Platform

Flutter Developer | Full-time, Remote | May 2026 – Present

- Developing a sports platform with features for **athlete profiles/CVs, AI-powered video analysis, sports marketplace, professional accounts, and targeted advertising**.
- Building the Flutter application foundation and responsive UI using **Clean Architecture and BLoC/Cubit**, with the project currently in early development.

BraceUp (Freelance) — Dental Education Platform

Freelance Flutter Developer | Remote | Mar 2026 – Present

- Independently developed and published an **offline-first educational app for dental fellowships** on Google Play and the App Store, reaching **about 60 installations**.
- Implemented **SQLite with Supabase synchronization** for authentication, database, storage, and real-time features.
- Built a **Flutter Web admin platform** for managing mock exams, courses, and student bookings, deployed on Vercel.
- Set up **CI/CD with Codemagic** and continue to maintain and improve the product.

App Store | Google Play

GIRIX — ERP & Business Management Solutions

Flutter Developer | Full-time | Mansoura, Egypt | Nov 2024 – Jun 2026

- Developed and maintained cross-platform Flutter applications across **ERP, POS, e-commerce & delivery, sales, and customer support** products.
- Integrated **REST APIs**, implemented UI/UX designs, and prepared and deployed applications to **Google Play and the App Store**.
- **Reusable ERP Package:** Co-developed `erp_calculator` with the team lead to centralize **tax, discount, and billing calculations** previously duplicated across applications. Contributed to the calculation logic, validated it against real application flows, and integrated it into Spider.

- **Package:** erp_calculator on pub.dev

Mindset Trainings

Flutter Instructor | Kafr El Sheikh, Egypt | Jun 2024 – Nov 2024

- Delivered Flutter courses from beginner to advanced level, covering UI development, state management, API integration and Firebase.

- Guided students through practical projects and best practices.

PROJECTS

Spider | Mar 2026 – Jun 2026 | GIRIX

- Contributed to a real-time business management and POS app (Cubit/BLoC, MVVM) with custom ERP integration, receipt printing, barcode and QR scanning, Firebase Cloud Messaging and localization.
- Integrated the erp_calculator package, then tested and validated it with a test and demo flow covering both the package and the application flow.

The Kitchen | Nov 2025 – Mar 2026 | GIRIX | Google Play | App Store

- Contributed to a restaurant POS app (Cubit, Clean Architecture) with real-time ERP sync, covering dine-in, takeaway and delivery orders, thermal invoice printing, order transfers, table switching, daily sessions, refunds and reporting.
- Worked on testing around account and calculation-related functionality.

Islami Hub | Oct 2025 – Nov 2025 | GIRIX| App Store

- Offline-first Islamic app (Flutter, Clean Architecture, Cubit, Hive) with a complete Quran with tafseer and multiple reciters, prayer time notifications, Qibla compass, radio and live Quran channels.

CRM GTS | Apr 2025 – Aug 2025 | GIRIX | App Store

- Customer support app for submitting and tracking tickets (Flutter, Cubit/BLoC, MVVM, REST and GraphQL) with real-time push notifications through Firebase Cloud Messaging.

GTS E-commerce & Delivery System | Jul 2025 – Oct 2025 | GIRIX

- Developed the Flutter application as the sole Flutter developer within a cross-functional team (Cubit, MVVM, ERP-integrated).
- Integrated SignalR for real-time order updates and order acceptance or rejection by delivery staff, plus payment gateways, delivery tracking, payment collection, animations and localization.

Dalil | Nov 2024 – Jan 2025 | GIRIX

- Services guide app (Flutter, BLoC/Cubit, MVVM) with Agora real-time chat and calls for technical support, Moyaser in-app payments, Firebase Cloud Messaging and localization.

EDUCATION

Bachelor of Computers and Information Sciences, Kafr El-Shaykh University
Information Science department | Very Good with Honors (81.36%) | Oct 2020 – Jun 2024

Graduation Project: Ghosn – Personal Plant Assistant App featuring AI-based disease diagnosis, an online plant store, plant care guidance, reminders, and a community for plant enthusiasts.

CERTIFICATIONS AND TRAINING

- **Software Engineer Certificate of Accomplishment**, HackerRank *(Sep 2025)* | Certificate
- **Software Technology Track**, Orange Digital Center, summer training (Aug 2023 – Sep 2023): OOP, design patterns and unit testing | Certificate
- **Flutter Diploma**, Google Developer Student (Dec 2022 – Sep 2023) | Certificate
